## 1 INTRODUCTION

Brickell FinTech Group is a financial software company led by a management team with deep international finance, risk management, regulatory, cryptography and FX trading experience.

- The company has been in operations since 2018, the goal is to empower UHNW and Family Office Private Clients to create, trade and reserve value using a Crypto Index managed by Artificial Intelligence (AI) through a robot advisor.
- The Company has fully invested in future-proof software and encryption to create the BFTG Token, a crypto coin backed by a portfolio of digital coins known as a CRYPTO INDEX to trade and store wealth that minimizes exposure to holders of a single digital coin.
- Diversified portfolios designed by a team of (human) specialists, and managed by the efficiency of high frequency trading by a robot advisor software
- Shaped by crypto coins with ethical track records, you'll only invest in coins that are listed in a minimum number of exchanges energy efficiency, or other environmentally friendly initiatives. Consider this portfolio type if security, discretion and trust are important to you.
- View performance and track your goals 24/7 with our suite of digital tools

BFTG Token was developed using statistical data analysis tools that automatically allow the best cryptos in the market to be selected and with these to form an index.

The functions of custody, trading, storage, investigation, analysis, security, and monitoring are delegated to the BFTG team, which has formed a committee that makes decisions. BFTG is a centralized token that can be purchased and redeemed only on the BFTG platform.

## **1.1 Warning Risk**

Before making the decision to invest, the respective investor must carry out a thorough analysis and consider their own financial, legal and tax situation. This document is designed to clearly describe the main features of the BFTG Token product.

Past results do not guarantee future results, therefore the information contained in this document cannot be used as investment advice.

## **2. INDEX SPECIFICATIONS**

The components of the BFTG token are cryptocurrencies that are acquired after the purchase of the BFTG token by users, so the value of BFTG is linked to the variation in the value of the underlying cryptocurrencies.

### **2.1 INITIAL VALUE**

The BFTG Token has a pre-launch value of 100 USDT (Tether) and the opening of operations will be on August 15th, 2022.

## **2.2 CALCULATION OF PRICES AND FREQUENCY**

The price of the Index is calculated every minute, from the average market volume-weighted pair prices for each of the constituents.

## **2.3 COMMITTEE**

A Committee comprised of members of the BRICKELL FINTECH GROUP (the "Committee" or the "Index Committee") is responsible for decisions regarding any changes to the Index Rules.

Any modification will be submitted to the Committee before its approval.

## **2.4 REBALANCE**

On each rebalancing date (180 days), the system will perform an automatic adjustment according to the parameters to generate a change in the components to the crypto index.

The new index constituents are weighted in a new basket.

## **2.5 HISTORICAL DATA**

Historical data, including back testing, will be maintained from the launch of the Index on August 15th, 2022.

### 3. INDEX COMPOSTION

#### 3.1 SELECTION

Cryptocurrencies will be selected based on the algorithm. The first version of the index will feature twelve (12) cryptocurrencies.

The initial composition of the index, as well as any adjustments in progress, is based on the following rules:

- The construction of the Index follows and analyzes around 20,000 different cryptocurrencies; this universe of assets is obtained from Coinmarketcap data
- Stable coins are removed from this universe.

#### 3.2 ORDINARY ADJUSTMENT

The composition of the Index will be adjusted every 180 days. The composition is reviewed on the day of the selection and the necessary changes are announced through the official communication channels as well as through the web platform.

#### 3.3 EXTRAORDINARY FIT

The Index Committee may make an adjustment if a situation is identified where an extraordinary event such as an exogenous shock may occur.

## 4. INDEX CALCULATION

### 4.1 INDEX FORMULA

We developed our own methodology that determines the ranking of cryptocurrencies according to seven (7) parameters. The tabulation range goes from 0 to 5, with 5 being the best score.

The value of the index in a corresponding minute during the rolling period is calculated according to the following formula:

$$P_{token_t} = P_{token_{t-1}} * \left[ 1 + \sum_{i=1}^{n=12} \frac{(P_{i,t} - P_{i,t-1})}{P_{i,t-1}} * X_i \right] * W_i$$

With:

- $W_i$  = Participation weight of each component in index  $i$  on the rebalancing day
- $P_{token}$  = Token Price
- $n$  = Number of cryptocurrencies
- $t - 1$  = Close in the previous trading minute

### 4.2 INDICATORS

The algorithm works with seven (7) indicators, five (5) of them are based on the price action and volatility of each cryptocurrency, and the other two (2) indicators are based on market capitalization.

### **4.3 ACCURACY**

The algorithm was developed for this product to outperform Bitcoin (BTC). This algorithm was evaluated after iterating thousands of times with different starting dates. For more information feel free to contact us at [contact@bftgtoken.io](mailto:contact@bftgtoken.io)

This back testing was carried out for more than 3 years (from march 2018 to date 2022).

### **4.4 WEIGHTING**

The weight assignment is based on the classification, which is a 100% automatic process according to the parameters used by the algorithm. Each cryptocurrency obtains a certain weight in the index, according to the ranking generated by the system's indicators.

After this step we developed a model to create a fundamental analysis which gives the index a second set of weights to complement it.

## **5. BACK TESTING**

The back testing was carried out for more than 3 years, from March 2018, and from that date, our algorithm creates a new balanced index every 180 days.

For detailed and up-to-date information on rebalancing dates, index composition and other relevant information, please visit our official website at: [www.bftgtoken.io](http://www.bftgtoken.io)

## **6. BFTG TOKEN**

### **6.1 Minimum Investment:**

\$250.00 USD

## 6.2 NETWORK

BFTG tokens are created and hosted on the Binance Smart Chain (BSC) blockchain under this contract address:

0x0ae3FE813FeE5BD70ee80f8C5df28FCBEEe2955C

Like any cryptocurrency, the token is public so transactions can be verified in the blockchain scanner at: <https://bscscan.com/>

**BINANCE  
SMART CHAIN**

## 6.3 ISSUANCE

The supply is unlimited, BFTG tokens are generated based on demand after a purchase on the BFTG web portal.

The BFTG token is only issued at the time an investor buys it, through said platform.

The issuance is linked to a smart contract function on the blockchain, to prevent human intervention in the creation of a new BFTG token.

## **6.4 INVESTMENT METHOD**

BFTG tokens can be purchased starting at a minimum of \$250.00 USD to be received only with the cryptocurrency Tether (USDT).

USDT is present on many blockchains, so please note that our systems are set up to receive only USDT on this blockchain:

- USDT TRC20 through the TRON blockchain network.

## **6.5 REDEMPTION**

Tokens can only be redeemed on the web portal [www.bftgtoken.io](http://www.bftgtoken.io)

BFTG tokens are burned upon redemption, which means that the tokens are destroyed upon redemption.

The minimum number of tokens to redeem will be the equivalent of \$200 USD at the time of redemption.

After redeeming the tokens, the smart contract generates the burning of the tokens and updates the circulating value in the blockchain, thus avoiding any human intervention in the burning of the tokens.

## **7. FEES**

The following fees are set at the time of creation:

- 3.5% single fee
- 5% penalty fee. Only if a user requires to redeem tokens prior the 180 minimum retention period.
- 30% of the investor's profit. Only if he closes the investment with profit, otherwise no other commission is generated

## **7.1 LOCK UP**

The minimum blocking period after each purchase of the BFTG token will be 180 days. Once this period is completed, the settlement will be enabled and will be available once a week, the dates and times will be published on the [www.bftg.io](http://www.bftg.io) site.

If a user requires to redeem tokens prior to the 180-day minimum retention period, they will incur a penalty fee of five percent (5%) calculated from the total amount of assets to be redeemed.

## **8. WEB PLATFORM**

Users will have access to our web platform at [www.bftgtoken.io](http://www.bftgtoken.io), where they can buy and redeem the BFTG token, track their investment and review more details of the crypto index.

The Platform will have a Security System with a double authenticity factor, being available for iOS and Android.

## 9. STORAGE

The cryptocurrencies are kept both in decentralized wallets and in reliable trading platforms and exchanges under the control of Brickell Fintech Group S.A.

The BFTG token is a custodial token, which means that users cannot mine, transfer, or withdraw BFTG tokens from the Brickell Fintech Group platform.

If a user loses their credentials, they will be able to regain access to the BFTG tokens through recovery protocols designed by the Brickell Fintech Group, after successfully identifying the owner of the tokens.

### 9.1 SPLIT

30% of the assets will be held on exchanges under the control of BFTG, the rest could be held in a decentralized wallet by the investor (the wallet keys will be shared between the investor and BFTG), this only applies for qualified investors with a minimum investment of \$50,000.00 USD.

### 9.2 CUSTODY PROTOCOL

The Index Committee has designed a chain of custody and security measures for the assets, in order to keep them safe from any possible risk.

## 10. REVISIONS

This document will be constantly updated to better reflect current events, such as the addition of new features and strategic changes. We advise you to review this document continually and whenever we post an update on the official website.
